**\*\*CostingNet\*\*** creates detailed costing sheets for a variety of products such as garments, home textiles, and footwear. It centralizes and standardizes costing elements, generating comparison reports for fabric, trim, labor, subcontracting, and transportation costs. This helps improve gross profit by identifying the lowest costs and highest-margin customers.

**\*\*Challenges with Conventional Methods\*\*** – Many merchandisers rely on Excel for costing, which can lead to multiple versions and confusion without proper checks. This complicates creating comparison reports and may result in lost information during changes in merchandising staff.

**\*\*CostingNet Solution\*\*** – CostingNet consolidates all costing sheets into a standardized format, allowing for quick generation of reports and effective cost control. This streamlines the quotation process and enhances competitiveness.

**\*\*Unique Features\*\*** – It offers multi-user capability, stability, and minimal maintenance, along with an activity log to track changes. The software supports dual currency summaries and various pricing calculations.

We believe CostingNet can significantly enhance your company's target costing, markup, and profit margins.
