ExportNet is a powerful tool for importers, exporters and trading companies control their buy and sell activities.

Trading companies deal with a lot of merchandising information every day, including prices, quote, product specification, MOQ, deliveries, surcharges and payment. Lost track on these vital issue will cause hidden problem either late deliveries, loose of profit or in worst scenario is losing the customer. ExportNet is designed to tackle these problem and offer a valuable solution with a simple and centralized database software.

It create catalog, cost sheet, quotes, trading document and full set shipping document. It uses these information to generate a margin comparison report on purchase and sales, which is used to find out the cheapest supplier and most generous customer. Hence, sharply increase company's profit margin. Outstanding shipment report to keep track of partial shipment in order to complete an order timely. Outstanding payment report to identify the credit situation of all customer. A unique quotation analysis report to show a full picture of quote against successful order confirmation. Which could help to increase successful quote for order confirmation.

In addition to generates catalog, costing, quotation, PI, PO, SC and full set document, it also issue invoice, customs invoice, shipping order, packing list, container tally sheet, form A application, Certificate of Origin, Country declaration and beneficiary statements. Packing modules suitable for

pre-pack, store pack, assorted pack, mixed article, color and size packing. Able to crop with 12 sizes, EAN No, Barcode No. & automatically calculate CBM, carton number, G.W., N.W., NNW.

We also provide cloud solution. Our customer can use the **Microsoft** cloud computing data center rented by us. They can remote access their own data 7x24 over internet with our daily support, services & maintenance.
