WarehouseNet is a simple warehouse management software for stock keeper daily logistics operation.

The design of WarehouseNet is very simple, easy & flexible. Whatever to learn, daily using or implement by stock keeper. We understand the warehouse environment is extremely busy and fast moving, most stock keeper will prefer a simple and flexible software in order to speed up their daily receiving and deliveries activities. Rather than using a complex MRP system which is actually slow them down.

leftover reports with different grouping, by article no, item, brand name, description, supplier and specification, FIFO, storage breakdown, storage charges calculation, low level alert and stock checking by location. Export closing stock report for accounting audit at the year end to save manpower and time to re-type by excel. Expiry date alert avoid expires and waste of day limited items. Storage days report reduced the storage day and hence minimizes depreciation percentage.

Item Master module maintain an instance preview of any item's in-out activities and leftover. Filter-&-search tools provide result list within second to find out inventory level.

We also provide cloud solution. Such that our customer can use the **Microsoft** cloud computing data center rented by us. They can remote access their own data 7x24 over internet with our support, services & maintenance. Customer is able to access their database anywhere from the world.
